ABHI KUMAR GURJAR

GENERATIVE AI & MACHINE LEARNING ENGINEER

New Delhi, India | +91 8868822114 | abhigurjar101@gmail.com | linkedin.com/in/abhigurjar

PROFESSIONAL SUMMARY

Generative AI and Machine Learning Engineer with 2+ years of experience building production-ready AI applications using Large Language Models (LLMs), Python, and REST APIs. Skilled in Retrieval-Augmented Generation (RAG) pipelines, prompt engineering, vector databases, and end-to-end ML workflows, from data engineering through model deployment. Proven track record automating business processes and delivering data-driven decision support across cross-functional teams.

CORE SKILLS

Languages & Libraries: Python, SQL, TensorFlow, PyTorch, Scikit-learn, NumPy, Pandas, NLTK, OpenCV

AI/ML: Machine Learning, Deep Learning, Generative AI, NLP, Computer Vision, Predictive Analytics, Model Deployment

GenAI & LLM Tooling: LangChain, LangGraph, Agentic AI, Hugging Face, Prompt Engineering, RAG, Vector Databases (FAISS, Qdrant), Semantic Search

Data Engineering: ETL Pipelines, Data Pipelines, Data Warehousing, Data Modeling, Data Cleaning & Preprocessing, Batch & Streaming Processing, Feature Engineering, REST APIs, SQL, Airflow

Cloud & Platforms: AWS, GCP, Cloud Computing, Power BI, Data Visualization

PROFESSIONAL EXPERIENCE

Sr. GenAI Trainer & Data Science Trainer — Uncodemy

Jul 2026 – Present

- Delivered advanced Generative AI and Data Science training programs for corporate batches, covering LLMs, RAG pipelines, prompt engineering, and end-to-end ML workflows.
- Designed and conducted hands-on corporate training curricula on Python, Machine Learning, Deep Learning, and applied Generative AI use cases.
- Mentored corporate learners on real-world AI/ML project implementation, model deployment, and industry best practices.
- Collaborated with corporate clients to customize training content aligned with organizational upskilling goals.

GenAI & Machine Learning Engineer — Ayush Bhandari LLP

Jun 2024 – Jul 2026

- Architected and deployed production-ready Generative AI solutions using Large Language Models (LLMs), Python, prompt engineering, and REST APIs to automate business workflows.
- Built decision-support tools that improved operational efficiency and enabled faster, data-driven business decisions.
- Partnered with stakeholders to translate business requirements into scalable AI-powered automation.

Python Developer — Sopta Farms

Apr 2023 – May 2024

- Engineered scalable Python-based ETL pipelines to automate data processing workflows across multiple data sources.
- Optimized data engineering processes to deliver high-quality, analysis-ready datasets for machine learning and predictive analytics use cases.

Founder — TeckLearn

3 months

- Founded TeckLearn at age 19, building it into an initiative focused on AI and business automation.
- Led cross-functional collaboration to automate manual processes and improve operational efficiency using Python and APIs.
- Directed development of AI-driven solutions for business automation initiatives.

FEATURED PROJECTS

AI-Powered YouTube Analytics Platform

- Built an AI-powered analytics platform (Python, Streamlit, OpenAI API, Pandas) to predict CTR, engagement, and audience growth.

- Automated keyword generation, title optimization, and metadata recommendations using NLP; delivered real-time dashboards for business insights.

Intelligent Document Question-Answering System (RAG)

- Built a Retrieval-Augmented Generation (RAG) system (Python, LangChain, Hugging Face, FAISS, Qdrant) for enterprise document search with semantic, context-aware responses.
- Designed scalable document ingestion and embedding pipelines.

NYC Taxi Fare Prediction System

- Developed regression models (Scikit-learn, Pandas, NumPy) to predict taxi fares, applying feature engineering and hyperparameter tuning to improve accuracy.
- Conducted exploratory data analysis and evaluated models using industry-standard machine learning metrics.

NLP Text Classification System

- Built NLP pipelines (NLTK, Scikit-learn, Transformers) for sentiment analysis and text classification using TF-IDF and transformer-based models.
- Evaluated models with precision, recall, F1-score, and cross-validation.

AI Recommendation System

- Built personalized recommendation models (Python, Scikit-learn, Pandas) combining collaborative and content-based filtering to increase user engagement.
- Enhanced recommendation quality through feature engineering and similarity analysis.

EDUCATION

M.Sc. in Machine Learning & AI *Expected 2027*

Hybrid program; focus on AI solutions and business automation.

Executive Diploma in Machine Learning & AI *2025 – Expected Dec 2026*

Hybrid program.

B.Tech in Computer Science & Engineering (Artificial Intelligence) *2020 – 2024*

CERTIFICATIONS

- Generative AI with Large Language Models — DeepLearning.AI & AWS
- Machine Learning Specialization — Stanford University (Coursera)
- Deep Learning Specialization — DeepLearning.AI
- Google Data Analytics Professional Certificate — Google
